# Take steps to conquer stairs

**"I love the house but stairs are becoming a problem."**

"If you have difficulty climbing stairs, the simple solution is the installation of a Bruno stairlift. Today's stairlifts are available for curved and straight rail staircases. They're quiet, clean, compact and extremely efficient.

**"But a stairlift will block the stairs!"**

Bruno stairlifts, when folded can be as narrow as 13". Options to "park" the stairlift away from the end of the stairs allows for furniture moving without needing to remove the stairlift.

**"I can't afford any costly renovations!"**

No major renovations are required. Bruno stairlift tracks mount to the stair tread, not the wall, so no alterations are necessary. No special power is needed and no restoration is required to remove the stairlift.

**Stairs shouldn't prevent you from enjoying your entire home. Battery powered Bruno Stairlifts help to remove barriers even when household power is lost.**

**Stairlift systems start at \$4,100.00 msrp. Contact us for complete details and pricing on the complete line of Bruno stairlifts.**
